**HOW MUCH DOES VA PAY?**

VA calculates annual pension by first determining for your particular circumstances that Maximum Annual Pension Rate (MAPR), an amount set by Congress. For example, if you are a Veteran with no dependents, the MAPR is $12,868. Next, VA determines your countable income. VA determines countable income by subtracting from your total income received in a particular 12-month period, the amount of those exclusions provided by law. VA subtracts your countable income from the MAPR; the difference is your annual pension entitlement. VA divides this amount by 12 and rounds down to the nearest dollar, this is the approximate amount of your monthly pension payment.

VA deducts certain expenses paid by you, e.g., unreimbursed medical expenses, from your annual household income, which will decrease your countable income and increase your monthly pension.
payment. A complete list of these exclusions is provided in section 3.272 of title 38, Code of Federal Regulations. These regulations are available at the Government Printing Offices website.
