

VALERI Special Announcement

June 10, 2019

We have been advised, there are integration issues with the backend server. Users are experiencing errors while in the system. Users transactions and reporting are not being processed accurately at this time.

In order for VA to remedy the situation, **we need all users to log out of the VALERI application immediately.**

Please advise your staff and other sections who may be using the system that immediate log-out is required.

At this time, we don't have an ETA for the system fix, but we will send an update when users are able to log back into the system and resume work. Additional information and guidance will be provided as it becomes available.
