1.1 Release Notes for LGY Suite - LGY 22.3.0

Release Notification

From: LGY

Version: 22.3.0

Production Deployment Date: January 13, 2022 @ 8:00PM CT/9:00PM ET

Focus of Release: The areas of focus for the 22.3.0 release include enhancements that get us closer to decommissioning Ebenefits and fully transitioning to VA.gov, providing Veterans the ability to request a COE through VA.gov, whether automatically approved or not. This release includes construction and valuation usability enhancements, allowing users to expand and collapse tables in the “View/Upload Documents” and “Appraiser Records” screens. In addition, a new approval workflow will be implemented prior to a TAS User mailing a Substantive Error Letter. This will ensure only warranted letters are sent to appraisers and SARs, resulting in a better overall relationship between LGY and appraisers. LGYHub will see several new pieces of functionality, including net new fields for critical, API and service enhancements, as well as the ability to upload documents larger than 100MB to the system. Our Contract Assurance Managers, Contract Assurance team members and CO Admins will see an increase in productivity and experience with the ability to create manual exceptions with the click of a button in the user interface and having the “Service Performed” drop down auto populate when certain BOC types are selected.
