1.0 Release Notes for VALERI – 13.0

Release Notification

From: VALERI

Version: 13.0

Production Deployment Date: November 18, 2021 @ 8:00PM CT/9:00PM ET

Focus of Release: VALERI 13.0 enhances several features of the claim process, to ensure claims are calculated correctly. This is of utmost importance to the Veteran, as the claim payment can impact remaining entitlement for the VA Home Loan Program. Several new reports are being created to monitor payments and identify appropriate points of contact within mortgage servicing companies. Additionally, through improved reporting and workload case assignment, technicians and servicers are better positioned to support Veterans efficiently and accurately.

1.1 Enhancements

Key	Component	Summary
LM-319209, LM-319217, LM-319225	Reports	This enhancement ensures that when VALERI SWP users access the “Bill of Collection Status and Offset” report in the VALERI Servicer Operational Reports folder, it will now display the BOC reason entered by the VA certifier for “Review Post Audit Incentive” and “Review Post Audit Claim” cases as well as display a more specific “Transaction Sub Type” instead of the generic transaction type.

1.2 Bugs

Key	Component	Summary
LM-319174	Reports	This fix ensures the “BOC Status and Offset” report will display certified BOCs on loans where the “Servicer” and/or “Assigned Technician” and the “Assigned Technician RLC” have been removed from the loan so that all certified BOCs display on the report.
LM-22053	SF	This fix ensures that when a loan modification is deleted in VALERI, the system will now create one consolidated loan note showing the loan information updates made for the deleted loan modification, instead of two separate loan notes.

Annex

Revision History

Date	Version	Description	Author
11/10/2021	1.0	Initial	Beth Ann VanVleet
